

The intermolecular electrostatic potential comes out to be – 5159kCal/mol and the van der Waals potential comes out to be approximately 600kCal/mol.

```
Electrostatic Potential:  -5159.430611238807  
Vanderwaal's Potential:  599.7631387966726  
Total Potential:         -4559.667472442134
```
